

## HOW KLEERMUCK WORKS:

Developed with nature in mind, KlearMuck utilizes a select proven combination of natural occurring bacteria, trace minerals and enzymes. This combination is extremely powerful at reducing organic waste (MUCK), odors and suspended organics in the water column. Several hours after KlearMuck is applied the specialized probiotics begin their search for an organic food source, starting the biological process. This process known as biological oxidation, is extremely effective at converting organic matter into a safe odor-less gas that escapes unnoticed out of the water column leaving a MUCK free bottom.

## WATER USE RESTRICTIONS:

Klear can be used in water bodies used for swimming, fishing, irrigation. Safe for pets, people, livestock, and aquatic life.

## STORAGE AND HANDLING:

Keep in original container and store in a cool dry place. Wash with soap and water after use. When stored properly KlearMuck has a 5 year shelf life.

### ENHANCE YOUR TREATMENT

For even faster muck reduction and to eliminate unwanted aquatic vegetation at the roots use the Muck Razer™ between treatments or whenever unwanted plants are present. To learn more visit [www.WeedRazers.com](http://www.WeedRazers.com)

- Treats 6 Surface Acres or 100' of Shoreline for 12 Months
